PROFILE SUMMARY

Frontend Developer with a B.Tech in Computer Science and hands-on experience building and deploying scalable web applications. Gained practical exposure to the full product lifecycle through projects like Dev Civitas and QKart, from shaping ideas into user stories, leading collaboration, building responsive frontends, testing APIs, and deploying with GitHub-Vercel CI/CD workflows. Skilled in React.js, Next.js, Tailwind CSS, Redux Toolkit Query, Node.js, and MySQL, with a focus on reusable components, smooth user experiences, and performance optimization.

TECHNICAL SKILLS

OS: Windows, Basics of Linux commands

Frontend Development: React.js, Next.js, HTML, CSS, JavaScript, TypeScript, Material-UI, Redux, SQL

Backend Technologies: Node.js, Express.js

Tools & Technologies: Git, GitHub, Vercel, Postman, Chrome DevTools

Concepts : RESTful APIs, HTTPS

EXPERIENCE

WebMentis Pvt Ltd.

March 2025 – July 2025

MERN Stack Developer — Frontend(Contract)|Remote & Asynchronous

- Developed ~30% of the frontend for "Spidy," a home service booking platform in a startup environment.
- Transformed static UI into dynamic, API-driven components, improving production efficiency by ~20%.
- Integrated Google Maps API for address auto-complete, cutting form fill time by 20–30s.
- Integrated and tested 50+ APIs for authentication, bookings, user profiles, services, and more.

PROJECTS

Dev Civitas: (Full-stack platform to connect developers)

On Going

Technologies: React, Vite, Redux Toolkit Query, Node.js, Express.js, Tailwind CSS

- Turned an idea into a prototype by defining user stories.
- Designed the business story and product concept, and began collaborating with a teammate on development.
- Currently building core features with Vite, React + Tailwind and integrating backend APIs (Node.js + Express.js).

Qtify (Feature-rich Song Browsing Platform) [Link](#)

12/2024

Technologies: ReactJS, Module-scoped CSS, flexbox, Material UI, Swiper, API Integration, Vercel, Figma

- Built dynamic UI with reusable components, reducing similar module development time by 40%..
- Built intuitive genre-based song filtering with REST APIs and custom MUI tabs, boosting user interaction by ~25%.
- Deployed on Vercel, showcasing streamlined CI/CD and cloud hosting practices.

Qkart (e-commerce Platform) [Link](#)

11/2024

Technologies: React, Debouncing, Local Storage, React Hooks, ES6, Material UI, Keyword Search, Unit Testing

- Developed a responsive e-commerce platform from scratch using React, MUI, and custom hooks.
- Implemented authentication, shopping cart, checkout flow, and filtering with REST API integration.
- Optimized application performance by ~15% through debounced search, local storage and cart persistence.
- Achieved ~20% improvement in production efficiency by writing modular, testable components.

QTrip-Dynamic [Link](#)

10/2024

Technologies: HTML, CSS, JavaScript, HTTP, REST, DOM Manipulation, Deployment on Render, cURL, JSON

- Built responsive pages using HTML, CSS, Bootstrap, and JavaScript.
- Enhanced UX with multi-select filters, carousels, and conditional rendering.
- Used local storage for preference persistence, handled form submission with fetch API.

EDUCATION

Crio.do : Fellowship in Software Development - Full-Stack Specialization

03/2024-present

B.Tech | Computer Science & Engineering | MCET (Murshidabad, West Bengal) - CGPA: 8.83

01/2020-07/2023

Diploma | Computer Science & Engineering | Jamia Millia Islamia (New Delhi) - 66.1 %

08/2016-08/2020
